MarkPoint™ for Wildland

## WILDFIRE STRATEGY ENHANCEMENT TOOL: MAP MARKUP AND PLANNING

Our Map Markup and Incident Planning Tool empowers users to collaboratively mark up maps of wildfire incidents, offering a range of benefits that support efficient planning and strategy development for wildfire control and suppression.

### KEY FEATURES

#### INTERACTIVE COLLABORATION:

Multiple users can mark up the map simultaneously, fostering real-time collaboration among incident responders, agencies, and stakeholders.

#### VISUAL STRATEGY DEVELOPMENT:

Allows users to visually illustrate their planned strategies on the map, helping responders and incident commanders better understand and coordinate suppression efforts.

#### RESOURCE ALLOCATION:

Users can identify and allocate resources precisely by marking key locations, such as fire lines, evacuation routes, staging areas, and water sources, optimizing resource deployment.

#### CUSTOMIZED INCIDENT PLANS:

Create tailored incident plans by sketching evacuation zones, containment lines, and critical decision points directly on the map, ensuring a clear and shared strategy.

#### IMPROVED COMMUNICATION:

Visual annotations on the map enhance communication among all involved parties, reducing the risk of misinterpretation and ensuring everyone is on the same page.

#### REAL-TIME UPDATES:

Adapt to evolving wildfire conditions by making instant updates and modifications to the incident plan as the situation changes.

**RISK ASSESSMENT:** Identify potential hazards and safety concerns by marking areas of concern on the map, enabling safer decision-making for responders and the public.

**HISTORICAL RECORDS:** Maintain a historical record of incident planning and strategy development, facilitating post-incident analysis and lessons learned.

**REMOTE COLLABORATION:** Supports remote collaboration, allowing experts and stakeholders from different locations to contribute to the incident planning process.

## KEY FEATURES (CONTINUED)

**EFFICIENT INCIDENT MANAGEMENT:** Streamline incident management by centralizing planning and strategy on a single map, reducing administrative tasks and improving response coordination.

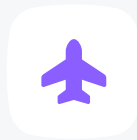

**ENHANCED PREPAREDNESS:** By allowing for thorough planning and strategy development, the tool contributes to enhanced preparedness, ensuring responders are ready to tackle wildfires effectively.

**TRAINING AND SIMULATION:** Use the tool for training exercises and simulations, allowing teams to practice and refine their incident planning and response strategies.

## OPTIONAL INTEGRATIONS for MarkPoint™

### AirPoint™

Our Map Markup and Incident Planning Tool empowers users to collaboratively mark up maps of large incidents, offering benefits that support planning, strategy and response.
